## NetSolCQ signs contract with General Capital Group PLC

7th September 2005 - Hot on the heels of contracting with Haydock Finance Ltd, one of the UK's leading independent finance companies, to implement their Lease**Soft** Asset Solution to deliver front-to-back office automated processing for their diverse and competitive finance products, NetSolCQ has signed a contract with General Capital Group plc.

General Capital is a leading independent finance house providing commercial asset financing, automobile financing, property financing and venture financing. The company has recently completed two acquisitions and is now in the process of consolidating the portfolio management operations of the businesses. NetSolCQ will assist General Capital in the consolidation of two legacy platforms into a robust NetSolCQ Lease**Soft** platform designed to manage the versatility of the company's products and support its plans for significant organic growth.

"We have spent a significant amount of time reviewing enterprise solutions with the sophistication we believe necessary to manage the diversity of our finance products and address the requirements of our target markets," commented General Capital Managing Director Mark Edworthy. "With NetSolCQ we have a business partner that will help us grow our business by providing a quality enterprise solution that can be implemented within our tight schedule."

"We have known the General Capital team for a number of years and are pleased to have the opportunity to deliver an integrated solution that is fully scalable to meet their future growth demands," said NetSolCQ Sales Director Johnnie Halliday. "We look forward to building a long, lasting relationship with General Capital and working closely with them as they continue to grow and their system needs evolve."

### Editors notes

---
